

A documentary series
for children

80 episodes
8 minutes each

Animals A to Z

Animals A to Z

It is like a big container of information, curiosity, and it answers many of questions frequently asked by children about the natural world.

The series' objective is to depict, reveal, and therefore help them understand the extraordinary world of nature, and unveil the secret life of the wild inhabitants of our planet, their features, their habits, but also their behaviour, and the interesting facts surrounding their extravagant adaptation to the natural environment that surrounds them. Being familiar with the natural world represents the first step towards loving, respecting, and defending our extraordinary natural treasures.

Each episode opens with a 20 second-long animated opening sequence, in which a small magician flips through the pages of his

magic book filled with animals and letters of the alphabet. At the end of the animation, the book opens on a page with a big letter imprinted, which is the initial of the specific episode's topic.

Each episode contains rare and unusual images of animal life, with a clear and direct commentary, and a linguistic style appropriate and appealing to children. Details and curiosities of

the natural world are highlighted in a simple but accurate way and in a way that attracts and holds the children's attention.

The entire series is like an adventurous journey with different stops, each one independent from the others, but all linked by a common topic: an exploratory journey of the our magician in the fascinating world of animal life!

A DOCUMENTARY SERIES FOR CHILDREN FROM 4 TO 10 YEAR OLDS

Length: 80 episodes of 8 minutes each
