

# The tree Hospital

**Directed by:** Massimiliano Sbrolla  
**Produced by:** SD Cinematografica  
**Duration:** 12'  
**Versions:**   
**Format:** SD

The institute for the Pathology of Forest Trees, deals with tree illness, which in the course of their long cycles, can fall victims to adversities of various natures. The principal objective of the centre is to study the agents responsible for the most devastating pathological manifestations, and the relative methods of dealing with them. It is all designed to adopt methods of defence respecting the environment. The protection of the centuries old chestnut woods of Montalto, the germoplasmic conservation of the oak, the rescue of the Cypresses of Carducci.
