In the most industrialized area of Italy, which includes Milan, Genoa and Bologna, live some of the largest colonies of herons in Europe. A few tall poplar trees among the smoke-stacks and factories is all a heron needs to found a community. The colony's proper name is "heronry". Sometimes even one large tree is enough. The documentary tells the story of a heronry situated in an isolated tree and the life revolving around it. We observed the colony through all four seasons, revealing a fascinating fresco of nature. The activity of the heronry is mingled with that of people working in the fields in this forgotten angle of the Padana plain.
