

# Pollino national park

---

**Directed by:** Piero Cannizzaro  
**Produced by:** SD Cinematografica  
**Duration:** 26 min.  
**Versions:**   
**Format:** HD

In Pollino National Park, between Basilicata and Calabria, there are numerous water springs, protagonists of the beauty of the landscapes. This territory is, however, well-known for the sulfur waters of "thermal baths", which have always given health and well-being due to their mineral properties. In this universe marked by the repetition of the seasons, the paths still breathe the fascination of the customs and culture of the peoples who live in the Pollino Park
